7.572 Quantitative Measurements and Modeling of Biological Systems

Survey Window: Spring 2024 End of Term | [View Current Catalog Entry](#) | [Print Report](#)

Report Includes Data for:
Students: For credit
Subjects: 7.572 Quantitative Measurements and Modeling of Biological Systems - Lecture L01
[\(filter data\)](#)

Eligible to Respond: 35

Total # of Respondents: 14

Response rate: 40%

Overall rating of subject: 6.3 out of 7

Comments on teaching (strengths, areas for improvement)

- [Student 9067](#) - Great at explaining concepts at a level you can understand.
- [Student 14291](#) - Julian was helpful and very responsive. You could tell how much they cared about teaching and helping students, which contributed to the value of the course.
- [Student 32588](#) - Julian rocks! He cares so much about teaching. He would walk me through every question very carefully and I really appreciated that. I feel like I was able to learn so much this semester because of the effort he put in! Thanks Julian
- [Student 34788](#) - Julian was great! He cared a lot about teaching and his explanations helped me understand the subject a lot better.
- [Student 37470](#) - This is a comment for both Julia and Julian. Whenever I went to office hours to ask about the problem set, I felt they were so worried about not giving me the answer that their explanations were very confusing. I'm not saying they should give me the answer, but they should find a way to avoid generating that confusion.
- [Student 56364](#) - Julian was a fantastic TA and was super available and great at explaining confusing concepts!

SUBJECT

SUBJECT	Rating Scale: 1=Strongly Disagree, 4=Neutral, 7=Strongly Agree, N/A=Not Applicable (7 is best)							RESPONSES	MEDIAN	STDEV
	AVG	1	2	3	4	5	6			
Subject expectations were clearly defined	6.9							14	7.0	0.36
Subject's learning objectives were met	6.8							14	7.0	0.43
Assignments contributed to my learning	6.6							14	7.0	0.65
Grading thus far has been fair	6.8							14	7.0	0.58

	Rating Scale: 1=Too Slow, 4=Just Right, 7=Too Fast, N/A=Not Applicable (4 is best)							RESPONSES	MEDIAN	STDEV
	AVG	1	2	3	4	5	6			
The pace of the class (content and assignments) was:	4.1							14	4.0	1.33

	AVG	RESPONSES	MEDIAN	STDEV
Average hours you spent per week on this subject in the classroom	3.4	11	3.0	0.81
Average hours you spent per week on this subject outside of the classroom	3.5	11	3.0	1.92

	Rating Scale: 1=Very Poor, 7=Excellent (7 is best)							RESPONSES	MEDIAN	STDEV
	AVG	1	2	3	4	5	6			
Overall rating of the subject	6.3							14	6.5	0.83

Comments on the subject (strengths, areas for improvement)

[Student 5310](#) - Great course and very accessible (remote lectures provided). Good explanation from Gene and the TAs have been great at providing further explanations.

[Student 14291](#) - Wish there was more in-depth math- derivations of some of the statistical laws, exploration of dynamic models in a bit more detail (maybe gene regulatory network motifs?) It felt like we didn't get past the first chapter of Uri Alon's Systems biology, despite it being suggested reading for the class.

[Student 32588](#) - This class is very applicable to my PhD in biology and I'm very glad I took it. This half of the class (Python quant bio) was very smooth and helped me to digest the first half of the class a lot more. I feel like it was understandable and manageable even though everything I learned was new to me.

[Student 34788](#) - I learned a lot and think this section of the class was especially useful for me. I thought the problem sets were well-developed and helped me learn!

[Student 37470](#) - The assignments did not accurately reflect the content of the exam. Although the assignments helped me understand the topics, they did not prepare me for the exam.

[Student 56364](#) - I learned a lot! The expectations were very realistic and I felt like I got a lot out of the assignments.
